

# MMS 2012 Schedule Planner

This document provides a session listing grouped by timeslot which is designed to help you plan your schedule for the week of the MMS 2012 event.

In the following pages each event timeslot is listed in turn, with a list of the topics being presented in that slot. To build your schedule simply examine the Breakouts (BRK) and Instructor-led Labs (ILL) listed and mark the sessions you wish to attend at that time.

Registered Attendees may also build their schedule on-line using the Schedule Builder tool on CommNet home, however this worksheet might still be useful as a pre-planner for that on-line process.

The diagram on the right provides a "Week-at-a-glance" view of the MMS 2012 event to assist in planning your week.
